NOTE: Most blades can be laser welded, except for those with hardened steel cores.

NOTE: No additional cost for Angle Drop Segs on Concrete Blades (X).

Optional Types of Undercut Protection

X Slant Seg Protection Used on cured concrete, standard asphalt and green blades when undercutting conditions are occurring. No additional cost for Angle Drop Segs on Concrete Blades (X).

R Radius Protection
Low cost undercut protection for average undercutting situations.

Q Insert Protection
Our most popular maximum wear retardant protection used in tough undercut conditions across North America.

CURED CONCRETE BLADE SPECS* (Application Code C)			
Aggregate Type	SPEC. #	Aggregate Type - Heavy Reinforcement	SPEC. #*
Hard	C51W	Hard	C50W, C51W
Med. Hard	C52	Med. Hard	C52
Medium	C56	Medium	C52
Med. Soft	C60	Med. Soft	C56
Soft	C62	Soft	C60

Select Grade
S Standard Gold Most concrete blades are laser welded.
H Heavy Duty Orange Any concrete blade can be laser welded or silver brazed upon request.
P Premium Black

* These are recommendations for starting specifications.
